

## T8 to T5 Retrofit Kit

Convert T8 Fixtures to T5 Fixtures

Allows for an easy updating of old inefficient fixtures, for greater energy efficiency and dollar savings.

Most Style Fixtures

Note: When making the retrofit from T8 Fluorescent Bulb to T5 Fluorescent Bulb always use a higher quality product than was previously used. Example: Choose a T5 Fluorescent Bulb with a higher CRI value, such as, 85+, and higher lumens, such as, 5000 lumens rather than a lower priced, thus lower quality bulb that may have a 60 CRI value and 2100 less lumens and a shorter lamp life. Increasing the quality of the bulb will determine the bulb replacement ratio that you will use, whether it's a ratio of 2 to 1, or 3 to 1, etc.,.

### Sockets adapt T8 to T5 linear fluorescent lamps

No change in socket bar tooling required. Fits existing slide-on T8 lampholder cutouts and compensates for variations in T5 length.

4-position, positive-stop lamp lock socket makes it simple for end-users to relamp in service.

### High efficiency Electronic Ballast

Fluorescent In-Fixture Electronic Ballasts. Solid-State Electronics, High power Factor, Small Case Size, Lightweight, Versatile, Energy Saving, 5 Year Warranty

For Conversion of Fixture  
to (one) F54T5HO BULB

**Order:** 1 x **BB32LMT** Ballast 120v-277v  
2 x **L13654EXL** Sockets UL 120W - 600V

For Conversion of Fixture  
to (two) F54t5HO BULBS

**Order:** 1 x **BB5LMT** Ballast 120v-277v  
4 x **L13654EXL** Sockets UL 120W - 600V
